

Baby Signing Workshop

Baby

Baby signing uses simple signs and gestures with pre-verbal children, helping them to understand and to communicate before they can talk.

Most of us have been in a situation in a foreign country where we didn't speak the language and found it really difficult and frustrating to communicate.

The same is true for babies when they can only cry or point to tell us things they want. Signing gives them a way of communicating how they are feeling and what they want without the crying!

Babies cry as a form of communication. When you teach your baby sign language, your child will start using signs instead of screams.

Some of the benefits of baby signing are:

- Reduce tantrums and fussiness
- Reduce parenting stress
- Instill confidence and security through understanding
- Open a window to your child's heart and mind
- More bonding & fun
- Stimulate early learning and build vocabulary

Join us for a Baby Signing Time Workshop where you will learn that signing is beneficial and fun for EVERY SINGLE BABY!

Prior registration and payment are required
